

TAJO-22

hyunsik

2013-04-01

Contents

Chapter 1

Root issue TAJO-22

1.1 Summary

The package prefix should be org.apache.tajo.

1.2 Description

Now, the package prefix is just tajo. The package prefix should be org.apache.tajo.

1.3 Attachments

1. [tajo-22.diff](#)
2. [TAJO-22.hyunsik.130702.patch.txt](#)

1.4 Comments

1. **initialcontext:** Yes this should happen right away. Might make a good (but tedious) newbie issue if anyone wants to encourage some new people to get involved?

2. **charsyam:** I am just a newbie for tajo. so, Hyunsik, could you assign this issue to me?

I am willing to do this job. :) Thank you.

3. **hyunsik:** Eli,

I agree with your thinking. This issue would be very good for some new people. Besides, I've added you as one of the jira administrators. You can add new contributors. Thanks!

DaeMyung,

Thank you for your interest! I've assigned this issue to you. This issue may be somewhat tedious because there are many modules and packages. Also, please note that some configuration files (e.g., tajo-default.xml and catalog-default.xml) may include full qualified class names. You have to change them too.

4. **hsaputra:** Hi DaeMyung,

Thnx for picking up this task.

Looks like this will be very important as part of incubation to make sure the transition happen before more code is added.

Please let us know if you need help with this.

5. **charsyam:** [~hyunsik]Please check this diff. :)
It is patch for latest version of tajo. :)
Thank you.
I'm sorry to make it late.
6. **hyunsik:** Thank you for your contribution. The patch looks great. I've improved your patch as follows:

- * Recover the property key names of *-default.xml files because the key names are not based on package names.
- ** From this change, I modified TajoConf that contains most of all property keys.
- * Recover pom.xml files for each package because the git address should be kept.
- * Recover the jvm option 'tajo.test' in TaskLauncherImpl because this is not a package name.

I've uploaded the improved patch. I verified 'mvn clean install'. If there is no objection until tomorrow, I'll commit this patch.

7. **jihoonson:** +1. This patch looks good to me.
8. **hyunsik:** Thank you for the review. I've just committed with your +1 because such a patch is very likely to be conflict with other works.

DaeMyung,
Thank you for your contribution.

9. **hudson:** Integrated in Tajo-trunk-postcommit #176 (See [https://builds.apache.org/job/Tajo-trunk-postcommit/176/])
TAJO-22: The package prefix should be org.apache.tajo. (DaeMyung Kang via hyunsik)
(Revision bc6359b834ebf67d212efc4fb785c186dc4d2a27)

Result = SUCCESS
