# Chapter 1

## Root issue TAJO-520

### 1.1 Summary

Move tajo-core-storage to tajo-storage

### 1.2 Description

tajo-core-storage is used in tajo-core-backend as well as tajo-client and tajo-jdbc. It's not a sub-module of tajo-core anymore.

So, we need to move it to upper module.

It's just a move, but we have to complete it before uploading tajo jars to public maven repo.

4. **jhkim:** Thank you for the review. I've just committed it.

5. **hudson:** SUCCESS: Integrated in Tajo-master-build #38 (See [<https://builds.apache.org/job/Tajo-master-build/38/>])
