Chapter 1

Root issue TAJO-792

1.1 Summary

Insert table with a qualified target table name can cause error.

1.2 Description

I made a table1 that is csv file format.
And I create other table2 that is rc file format.

```
1  insert overwrite into "table2" select * from "db"."table1" (o)
2  insert overwrite into "db"."table2" select * from "db"."table1" (x)
```

Recently days, Tajo was added rule [select * from "db"."table_name"].
But, I think insert rule was not added. :)
